## **Open Door Health Center**

Being a patient at ODHC means having a health care home. Our team of licensed, caring professionals work together to integrate your care, focusing on all your health care needs. We recognize that many external factors can affect your overall health such as food and housing insecurity or legal issues. That is why Open Door has Community Health Workers to ensure our patients have access to resources that can help.

## **Community Health Workers (CHWs)**

CHWs have a deep understanding of the community they serve. They are our number one tool for breaking down barriers to services within our community. This allows them to connect patients to the best community resources that can help them with a wide range of issues such as:

- Food insecurity
- Housing assistance
- Financial assistance
- Legal issues
- Health insurance
- Domestic violence
- Addiction treatment
- Unemployment
- Clothing
- Transportation
